

Puxu vacuum pump filter

普旭真空泵过滤器

普旭真空泵过滤器——高效率的真空泵过滤系统。真空泵排气过滤器从泵的出口去除油微粒，减少油的残留和微小颗粒。排气过滤器包括一个高效过滤器滤芯，可将收集的油不断排放回机器的油箱。该过程使用户能够回收润滑剂并延长真空泵的正常运行时间。

- 最高效的油雾分离系统源自最优化的设计
- 更低的电耗- 更小的过滤阻力
- 极高的化学稳定性- 从容应对各种化合物，如溶剂、汽油、酸、碱等。几乎适用于所有应用。

puxu Vacuum Pump Filters - high-efficiency vacuum pump filtration systems. The vacuum pump exhaust filter removes oil particles from the pump outlet, reducing oil residue and fine particles. The exhaust filter includes a high-efficiency filter element that continuously drains the collected oil back into the machine's oil tank. This process enables users to recycle lubricants and increase vacuum pump uptime.

The most efficient oil mist separation system comes from the most optimized design
Lower power consumption – smaller filter resistance
High Chemical Stability – Resistant to various compounds such as solvents, gasoline, acids, bases, etc. Suitable for almost all applications.
